

LIVOS SALIS NATURAL FINGER-PAINTS

APPLICATIONS: Absorbent materials like wood, stone, unglazed clay, wood shavings (e.g. little boxes), paper and cardboard. Slip casting gypsum, salt dough and many others.

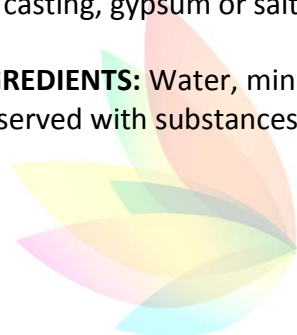

VARIATION OF USES:

PREPARATION: Brushes, water to dilute, perhaps a mug or white tile, because of possible pollution the paint used, should not be taken directly out of the container. Every possible introduction of dirt will heighten the danger of germinal contamination.

PROTECTIVE CLOTHING is advisable even if spots can be washed out in most instances.

APPLICATION: Spread the paint directly with a brush or fingers, diluted or undiluted. All colours are inter-mixable. To produce a water repellent surface, apply LANON Toy Stain after a drying time of 24hrs, very sparingly to decorative objects, i.e. made of wood, clay, slip casting, gypsum or salt dough.

INGREDIENTS: Water, mineral pigments, hemp oil, methyl cellulose, extract of gentian roots preserved with substances permitted in pharmaceuticals and food.
